

Krish Bhuva

Software Developer

+919316039623 ◇ bhuvakrish03@gmail.com ◇ Pune, India ◇ [LinkedIn](#) ◇ [Github](#) ◇ [Portfolio](#)

SUMMARY

Full Stack focused Software Engineer and recent Computer Science graduate with demonstrated expertise in building and scaling web services. Skilled in architecting RESTful APIs with Core Java and Spring, hardening applications through secure authentication (bcrypt), and streamlining deployments via Docker containerisation with deep proficiency in MongoDB and PostgreSQL for high-availability, data driven applications.

EXPERIENCE

ValueDx, Intern

Jun '25 — Oct '25
Pune

- Optimized **transaction-history** and **customer-account** REST APIs using **advanced SQL query tuning** and **indexing**, reducing **API latency by 35%** and **operational costs**
- Enhanced the **Online Banking Platform** backend by applying **Data Structures and Algorithms (DSA)** to core logic, improving **transaction throughput by 40%**
- Validated **complex SQL database interactions** through **comprehensive test suites**, achieving **85%+ code coverage** and reducing **production bugs by 60%**
- Executed **secure coding practices** and applied **efficient Data Structures** to **design patterns**, significantly improving **code maintainability** and **security**

Raise Digital, Full Stack Developer

Jan '25 — Apr '25
Vadodara

- Developed **responsive web applications** using **React.js**, **Node.js**, **Express.js**, and **MongoDB** for **import-export workflows**, reducing **processing time by 25%**
- Built **RESTful APIs** for **shipment tracking** and **inventory management**; streamlined **MongoDB queries** with **indexing**, decreasing **response time by 40%**
- Integrated **third-party logistics and payment APIs** (**Stripe**, **PayPal**), improving **data accuracy by 30%** and reducing **manual effort by 50%**

SKILLS & INTERESTS

Programming Languages Java, JavaScript, SQL, Python

Backend Technologies Spring, Spring Boot, Node.js, Express.js, RESTful APIs

Frontend Technologies React.js, Tailwind CSS, Bootstrap, Responsive Web Design, HTML, CSS

Tech Stack DSA, MySQL, PostgreSQL, Docker, RabbitMQ, Redisson, Kafka, Azure, Git, GitHub, Postman, Insomnia, MongoDB, Linux, Agile Methodology, Scrum

AI Tools ClaudeCode, ChatGPT, Github Copilot

Soft Skills Time Management, Analytical Thinking, Team Management

PROJECTS

Concurrent Ticket Booking System (IRCTC-Inspired)

- Architected dual-layer concurrency control using **Redis distributed locks (Redisson)** and **PostgreSQL pessimistic row locking**, eliminating race conditions across **14 coach classes** and **7 quota types** under **100+ simultaneous requests**.
- Engineered deadlock-free seat reservation logic via **globally sorted lock acquisition** with **3,000ms wait time** and **600,000ms auto-expiry**, preventing circular waits across concurrent multi-seat transactions.
- Built asynchronous booking pipeline using **RabbitMQ** producers/consumers for decoupled confirmation and cancellation workflows, with automatic waitlist promotion on seat release.
- Optimized query performance via **8 targeted PostgreSQL partial indexes** for availability scans, PNR lookups, and lock cleanup, managed through **Flyway schema migrations**.

EDUCATION

Parul University (GPA: 7.66)

Aug '22 — May '25

- Pursued **B.Tech in Computer Engineering** at **Parul University** with coursework in **full stack development & cloud computing**; participated in **hackathons & coding competitions** to build **technical expertise**
